

Operation Transportation Report December 2011 J. Hanlon, Secretary-Treasurer

Maintenance

December continued to be a busy time for our maintenance personnel. Several of the projects tackled during this time included:

- GFSS - gym floor
- WBES -gym lights
- Hutton – installed sound system for special ed students
- Big White – projector and smart board installed as well as installation of walls in the basement to block off storage area
- Cupboards have been ordered for nutrition rooms
- Put up and take down of risers for the Christmas Concerts
- Snow removal
- Completion of routine work orders
- And some holiday time was also taken!

Custodians

This is the second year with a reduced winter clean of five days rather than seven. Due to this time limitation, some schools did not have their lockers cleaned during the winter break. We want to contact several other districts to see if doing a team clean during these breaks would possibly present a more efficient option. The custodians did a great job considering this shortened schedule and we appreciate their dedication and the pride they take in their work.

Technology

The technology staff continues to do a lot of trouble shooting. During December they deployed trustee and education assistant laptops as well as updating software. Vandalism of computer equipment is happening at some schools. The schools will be taking responsibility for the damaged equipment with replacement parts coming from school budgets.
